

Company procurement manual

From secure invitation to receiving and reconciliation

For Company Administrators, Branch Administrators, Approvers, Requesters, Finance Reviewers, Receivers and Auditors

Your company controls people, branches, budgets, requests, approvals and receiving. Axora controls the global catalog, private sourcing and operational fulfilment.

WORKFLOW ILLUSTRATION

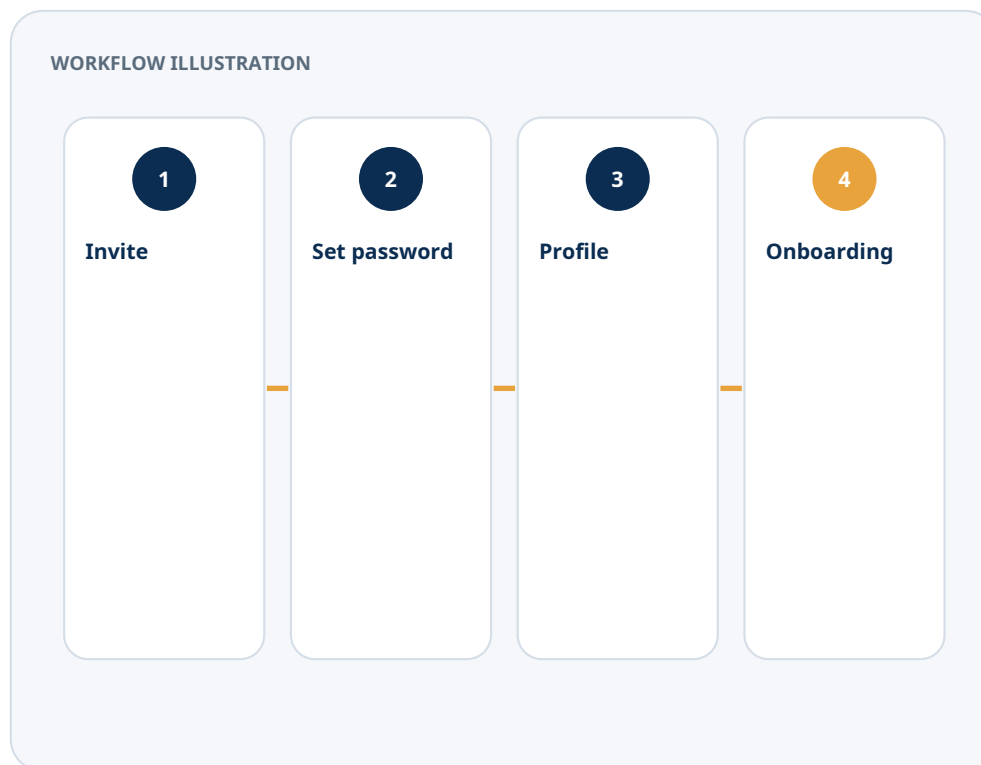

WELCOME

Activate your own account

Every person uses a named account and creates their own password from a one-time invitation link.

- 1 Open the invitation**
 Check the company, role, branch and expiry shown in the Axora email.
- 2 Create your password**
 Use the single-use Axora setup page. The administrator never sees or shares your password.
- 3 Complete your profile**
 Confirm your name, job title, phone, language, timezone and branch.
- 4 Follow onboarding**
 Complete, skip one step, or return later. Help can restart any role-specific step.

WORKFLOW ILLUSTRATION

SAFE ACCESS

Never forward an invitation link or send a password to support.

NAVIGATION

Use the top application shell

The shell keeps frequent work visible while administrative tools stay in the hamburger drawer.

Open the hamburger

- 1 Use the three-line button at top left for Settings, Help, Audit history and role-specific tools.

Check the active logo

- 2 The company logo appears beside the menu and the portal applies its accessible company theme automatically.

Use common modules

- 3 Dashboard, Shop, Requests, Approvals, Deliveries and Invoices appear only when your role permits them.

Use profile and language

- 4 Open the avatar at top right for account, security and sign out. Change language beside it.

WORKFLOW ILLUSTRATION

MOBILE

On a phone, open one compact menu and use the same large, labelled actions.

ROLES & SCOPE

Give people only the access they need

Roles control actions. Company and branch scope control which records a person may see.

- 1 Company Administrator**
 Manages company information, branches, budgets, people and company-wide approvals.
- 2 Branch Administrator**
 Manages assigned-branch people, requests, budget visibility and deliveries.
- 3 Purchase Requester**
 Shops, creates requests and follows records permitted by their scope.
- 4 Approvers and reviewers**
 Branch Approver, Company Approver, Finance Reviewer, Receiving User and Read-Only Auditor have separate duties.

WORKFLOW ILLUSTRATION

SEPARATION OF DUTIES

Nobody may approve their own request. Auditors cannot edit.

BRANCHES & BUDGET

Prepare purchasing controls

A branch defines delivery scope; its budget controls approved purchasing.

WORKFLOW ILLUSTRATION

NO MANUAL COLOUR EDITOR

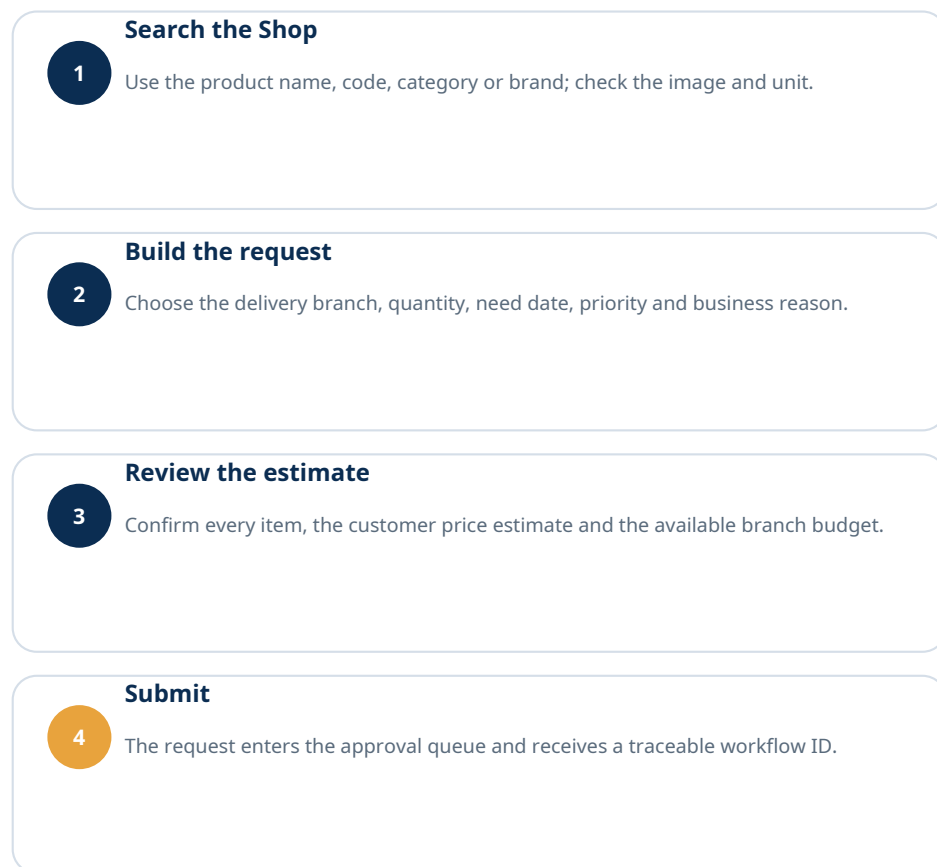

Company colours are derived safely from the logo and cannot be edited by company users.

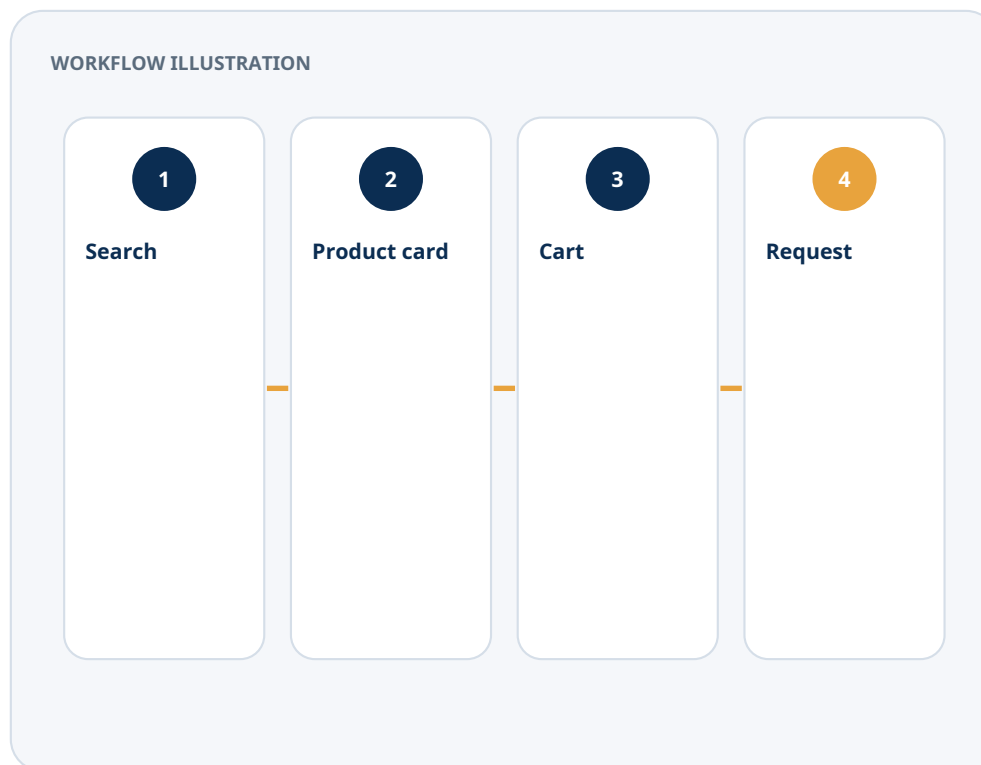

SHOP & REQUEST

Choose products and submit a need

The Shop contains Axora-managed products with image, name and ordering details.

WORKFLOW ILLUSTRATION

CUSTOMER BOUNDARY

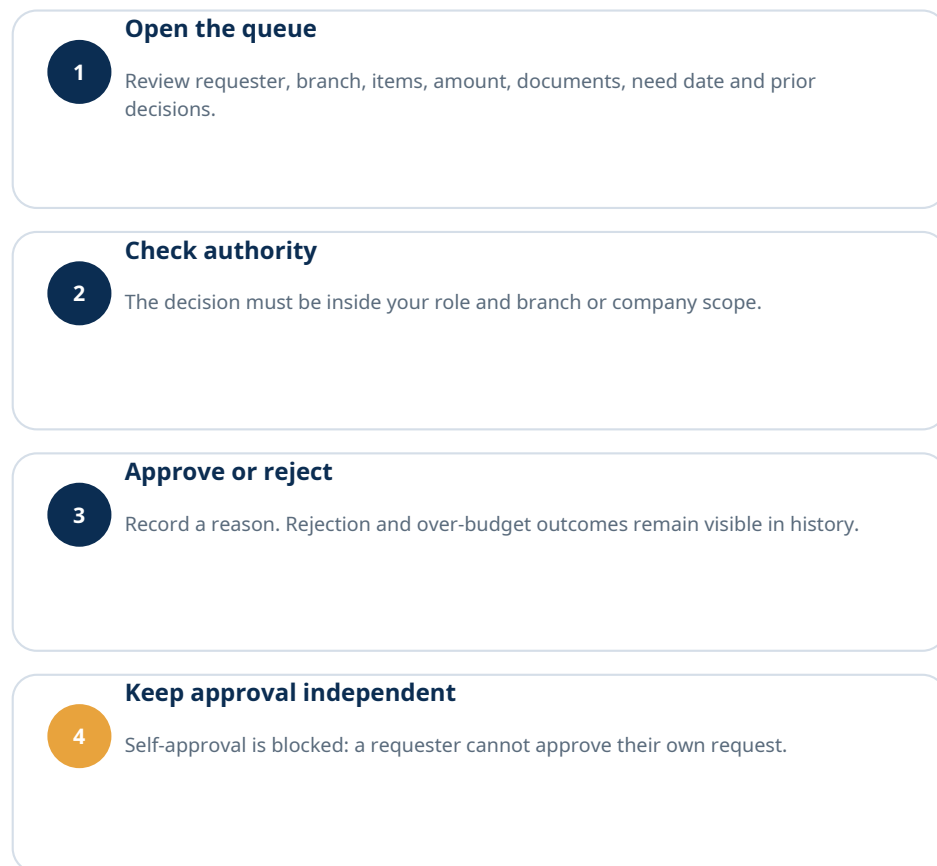

Company users do not create catalog products or see Axora buying cost or private supplier details.

APPROVALS

Make a recorded company decision

An authorized approver checks the business need, evidence and budget impact.

WORKFLOW ILLUSTRATION

APPROVAL MEANS

Approval authorizes company budget; Axora then manages sourcing and fulfilment.

TRACKING

Follow the complete request timeline

The current status and append-only events explain what happened, when and by whom.

1

Open the request
Read plain-language status, next action, responsible role and expected timing.

2

Use the timeline
Follow approval, quotation, supplier selection, order, delivery, receipt, invoice and payment events.

3

Use notifications
Open role-relevant in-app alerts or safe email links; mark items read when handled.

4

Report delays
Use the workflow ID when asking for help; never send confidential documents outside Axora.

WORKFLOW ILLUSTRATION

PRIVACY

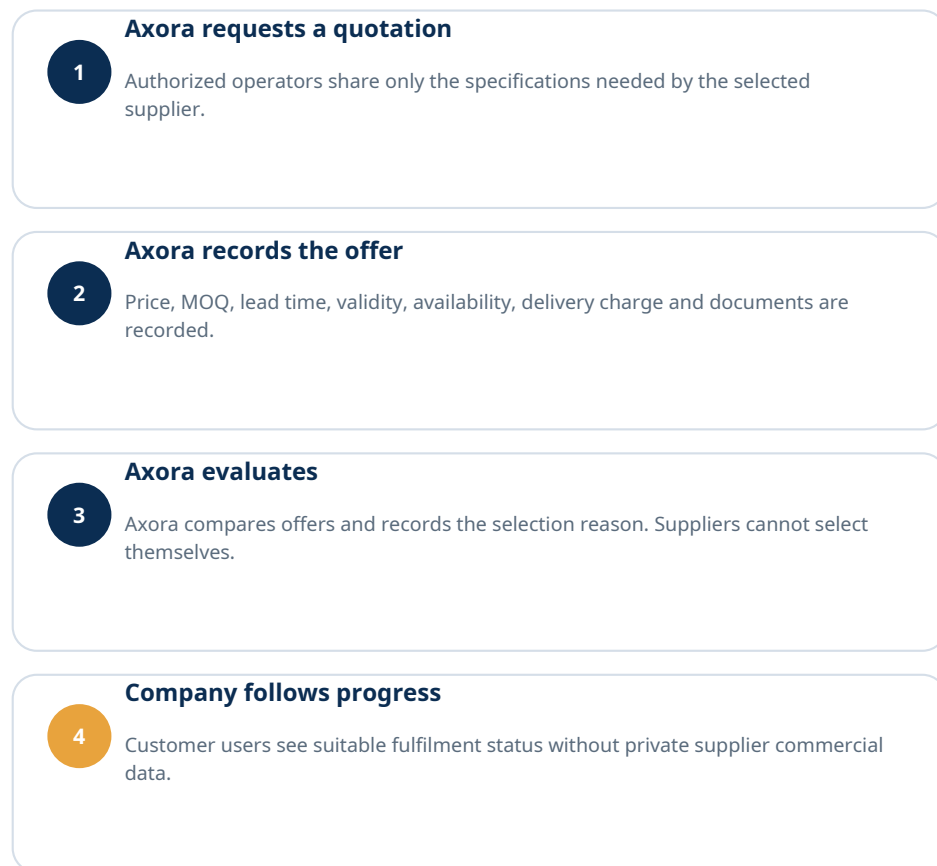

You see only timeline details allowed by your tenant, role and branch scope.

SUPPLIER COLLABORATION

Understand the quotation stage

Axora staff manage approved suppliers and quotations in a private internal workspace after company approval.

WORKFLOW ILLUSTRATION

CONFIDENTIALITY

Competing suppliers, quotations, Axora margin and internal selection notes remain private.

DELIVERY

Follow a mobile delivery safely

The assigned driver uses a focused phone portal; the branch keeps independent receiving authority.

Assignment

- 1 The driver sees today's assigned stop, approved address, contact, package summary and instructions.

Journey events

- 2 Accept, start trip, arrive, attempt, partial delivery, delivered or report an issue.

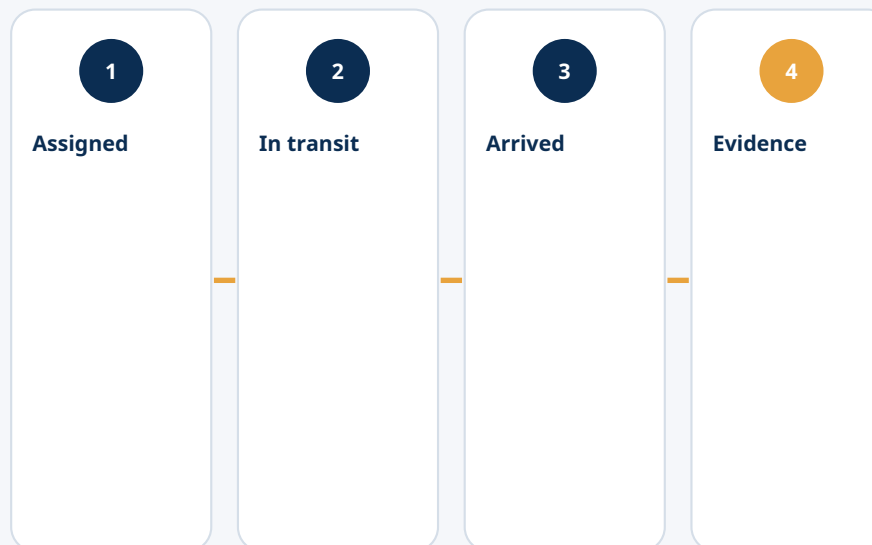

Driver evidence

- 3 Upload permitted proof and record receiver name, quantity, damage or missing items.

Weak network

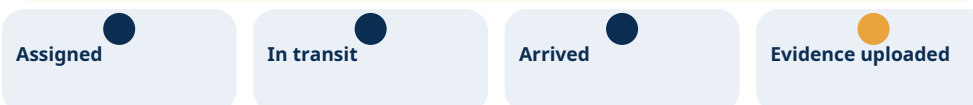

- 4 Queued events remain visible until synchronized; an event must never disappear silently.

WORKFLOW ILLUSTRATION

LIMITED ACCESS

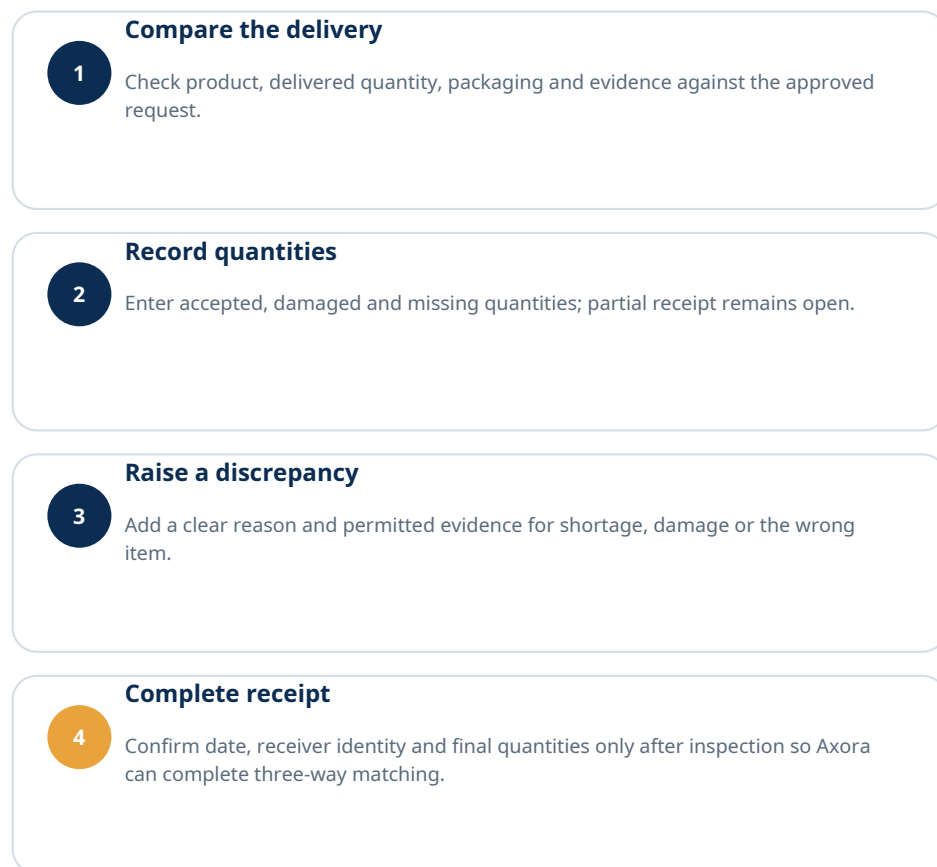

Drivers cannot see budgets, invoices, user lists, supplier prices or unrelated requests.

RECEIVING

Confirm receipt independently

Driver evidence is not final acceptance. An assigned Receiving User records inspection.

WORKFLOW ILLUSTRATION

INDEPENDENT CONTROL

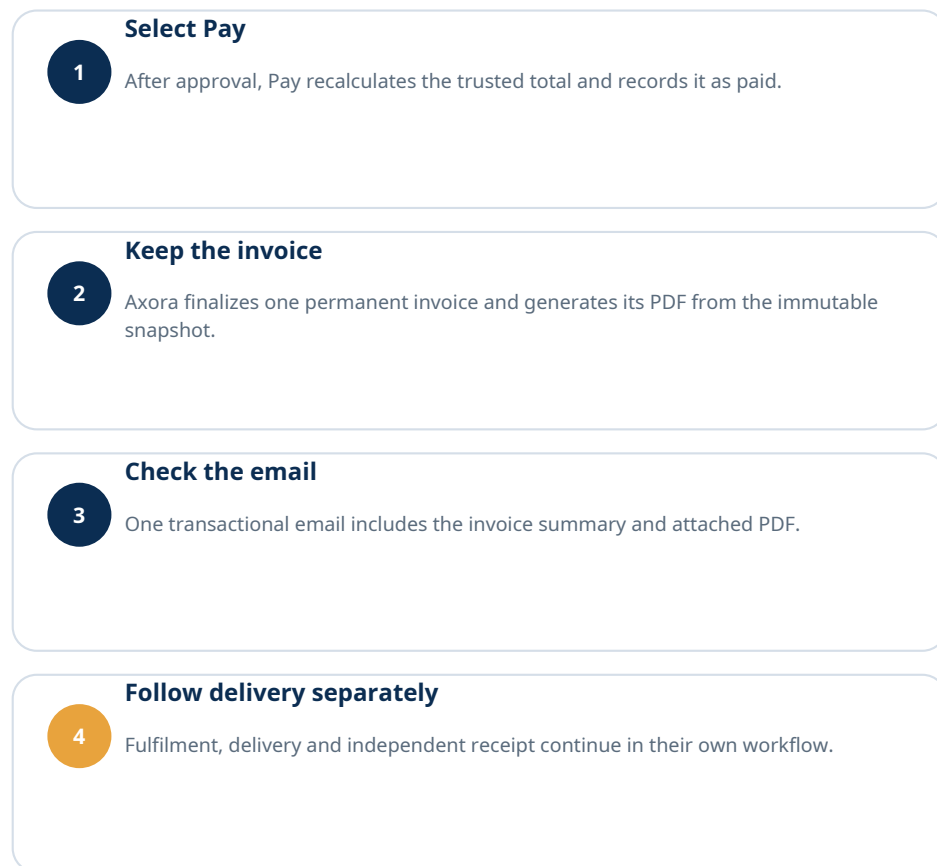

A driver cannot create final receiving approval alone.

FINANCE

Pay and keep the finalized invoice

Payment, invoice finalization and physical delivery are independent auditable states.

WORKFLOW ILLUSTRATION

PLAIN LANGUAGE

A failed invoice email does not reverse a valid paid record or finalized invoice.

ACCOUNT

Protect your profile and sessions

Your avatar menu contains personal settings without interrupting purchasing work.

1

Keep profile current
Maintain phone, language, timezone, avatar and notification preference.

2

Change password safely
Enter the current password, create a strong new one and choose whether to sign out other sessions.

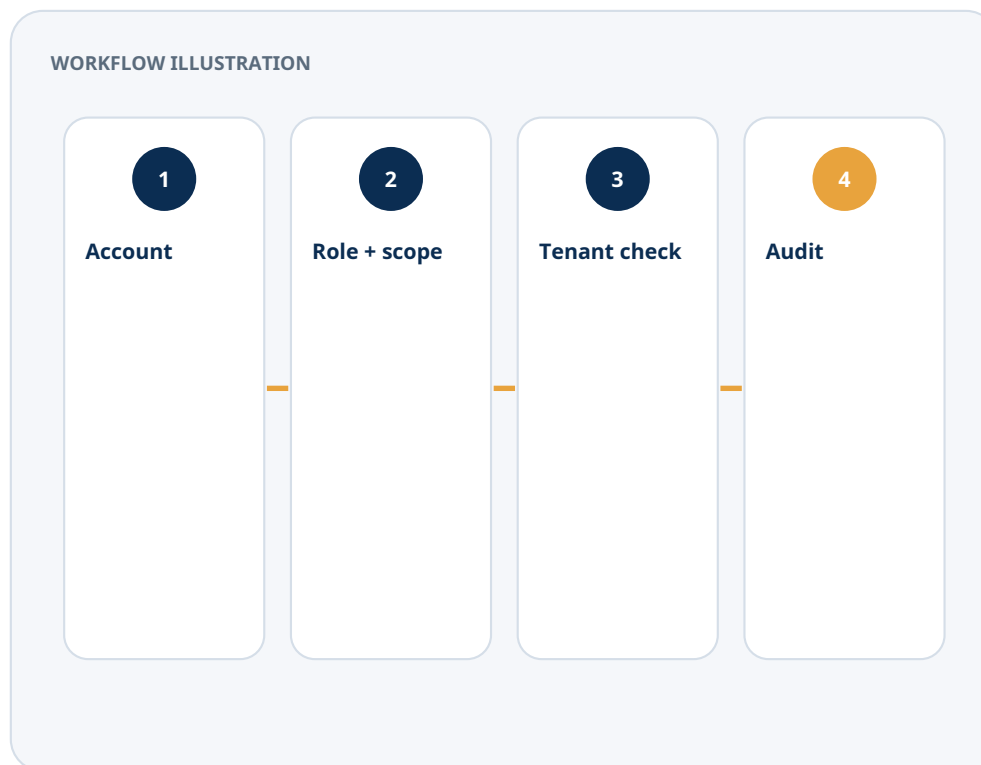

3

Review active sessions
End a device session you do not recognize and report suspicious activity.

4

Use recovery
Use the email reset link when needed. Axora never asks you to reveal a password.

WORKFLOW ILLUSTRATION

READY CHECK

Use a password manager, keep contact details current and sign out on shared devices.
